# The Total Solution For Safety & Quality Critical Fastening Operations

Cleco's fastening technology is used globally and across all industries. This technology is used in Aerospace, Motor Vehicle, Offroad, Wind Energy, Agriculture, and a great multitude of applications within general industry where "quality critical" requirements are the rule. In motor vehicle environments across the globe, Cleco and DGD's complete line of transducerized electric tools are used in "safety critical" applications where spot-on precision and traceability are required. And finally, in one of the most demanding environments, our line of DC electric tools are used in aircraft assembly where "good enough" will never be acceptable.

Because of our drive for perfection, you can excel in your job. Indeed, due to our uncommon focus on

total fastening solutions instead of just products, our customers look upon us not merely as vendors, but as strategic allies. And at Apex, we welcome the challenge of leadership this imposes.

## The Systems

Cleco's state of the art Tightening System delivers unprecedented performance, productivity and accountability in both "quality critical" and "safety critical" assembly applications.

Durability, speed, and ergonomics are achieved using the corded Cleco DC electric tools with a complete line of tool configurations and an assortment of controller options to choose from.

The Cleco LiveWire™ system provides the most cost-effective safety critical fastening solution available in the world today. By marrying cordless tools and WiFi communications, the operators gain the mobility and flexibility they need to increase productivity and reduce in-system damage costs. One line controller managing up to 16 cordless tools while utilizing the most up-to-date wireless encryption technology provides a cost savings unparalleled in industry today.

When considering the cumulative impact of all these components – the tools, the controllers, the software, the flexibility, the accessories and the support – it is easy to see why the Cleco Tightening System is the benchmark for all DC electric tool systems.

### Application Segment

Cleco®

# The Most Flexible, Cost-Effective

Introducing the Cleco **mPro400GC** Global Controller, the first controller for safety-critical applications that offers unsurpassed levels of flexibility, connectivity, and serviceability while providing superb torque accuracy and process control. This new controller incorporates the advanced technical features of the proven DGD mPro system with the user-friendly software of the trusted Cleco TME controller, resulting in a powerful control solution that offers impressive cost savings through unequalled flexibility.

## ***Corded, Cordless, Or Fixtured ... All From One Controller***

The Cleco **mPro400GC** Global Controller is compatible with all Cleco 18-48 Series DC electric corded tools, LiveWire cordless tools, and all DGD and EMT fixtured spindles. That means fewer controllers and cables are needed for your line. And that means savings...up to 50% over traditional systems.

## ***Reduce System Costs Up To 50%***

- Configure up to 32 DC spindles in varying configurations. Consult your Apex representative for details.
- **Facility Cost Savings**
  - Installation Expenses: Save on Ethernet and power drops, controller stands, cable management, labor to install and support
  - Production Expenses: One controller means fewer backups, fewer repairs, fewer headaches and one-time training

# Universal Connectivity

Universal connectivity begins with global auto-sensing input voltage, 16 configurable inputs and outputs, plus DeviceNet, Ethernet-IP, Profibus and Profinet fieldbus standards. User-friendly software mapping of discrete and fieldbus selections provides ultimate error-proofing control. Dual fieldbus ports allow redundant I/O mapping or expansion. Utilize two different fieldbus standards simultaneously for maximum flexibility.

The Cleco **mPro400GC** Global Controller comes standard with a system bus to manage internal data flow and avoid burdening outside networks. It can be utilized for rapid “grab and go” connectivity to accessories, such as adding error-proofing

from socket trays, stack lights, or operator boxes. Configurable software menus allow quick integration into any process. With up to 32 configurable nodes on the system bus, endless error-proofing combinations are possible.

The system bus can manage multiple secondary controllers in combination with single and multi-spindle stations. Spindle sequencing, data management, and diagnostics are just a few of the many functions performed. In addition, DGD® Fixtured Intelligent Spindles can utilize the system bus to drive up to 30% of cost out of a traditional system through cable reduction, maximizing acquisition and facility cost savings.

## Universal Connectivity

- Auto-Sensing Voltage
- 16 Configurable I/O's
- Redundant Fieldbus
- Redundant Serial and Ethernet Ports
- Isolated System Bus

# For Ultimate Flexibility

## Rundown Data Storage

The **mPro400GC** supports TorqueNet, our data collection and archiving software, as well as other industry standard software packages. Protocols are available for many of the standard products.

The Cleco **mPro400GC** Global Controller works seamlessly with current protocols and offers significant performance advantages over traditional systems. Features include:

- A single software program that covers both standard and fixtured applications
- Standard spindle sequencing and reject management
- 19 advanced fastening control sequences standard at no additional cost
- Remote programming software with no licensing restrictions
- Touch screen display with integrated alpha-numeric keyboard

**No Software Licensing!**

# Superior Serviceability For

## Installation Flexibility

At only 10" w X 15" h X 15" d (254mm X 381mm X 381mm) and weighing just 30 lbs. (13.6 kg.), the Cleco **mPro400GC** is smaller and lighter than most traditional controllers. It can be lifted easily by a single person and will mount just about anywhere.

**10" x 15" x 15"**  
(254mm X 381mm X 381mm)  
**And Just 30 lbs.**  
(13.6 kg.)

Master/Primary Unit

# Exceptional Ease-Of-Use

## Quick Mount Bracket

No more templates and measuring mounting hole patterns...installation of the **mPro400GC** is simple with a separate receiver bracket that makes locating mounting holes easy. The unit then attaches directly to the bracket so the installation is fast and foolproof.

## Integrated Cable Management

The **mPro400GC** mounting bracket incorporates an integral cable management channel, so installations stay orderly and easily accessible. Clearly labeled connectors and top-down cable routing means a clean installation with no guesswork. Mounting was designed to be simple and effective to get you up and running fast.

## CompactFlash® Memory For Production Uptime

A standard CompactFlash card reliably stores:

- Operating system
- Drivers
- Network settings
- Application parameters
- Torque data

**50  
Second  
Boot!**

Positioned on the back of the unit for added security and tamper resistance, the card is still easily accessible.

- Rapid controller swap with 50-second boot
- No licensing or proprietary hardware
- Card stores up to 10,000 rundowns

## Secondary Controller Functionality

A secondary controller is controlled from a master or primary unit. It has I/O for local error proofing and peripherals, plus a LCD for operator feedback and troubleshooting.

# All The Brains. All The Power.

LiveWire™ offers precision torque, angle and speed control features for safety critical fastening in an ergonomic, wireless design.

With up to 1,700 rundowns per battery charge or continuous power, your safety critical applications are assured to never run out of power.

LiveWire™ has been designed and tested to provide wireless connectivity across the harshest of machine-to-machine environments.

## Digital Process Control

- Auto bolt sequencing
- Auto image selection
- Configurable reject management

## Electronic Intelligence

- On-board controller with power management
- Integrated servo with I/O signal handling
- Auto sensing power intelligence
- 512 cycle memory buffer

# Power. And It's Wireless.

## Integrated Bar Code Scanner (optional)

- Enables real-time bar code data collection
- Programmable bit for Auto Parameter Select
- Tool enable and disable configurability

## Operator Display

- Real-time interface
- Redundant feedback
  - Green LCD = OK
  - Yellow LCD = Running
  - Red LCD = NOK / Errors
  - Green LED = OK
  - Red LED = NOK
- Configurable application buttons

# The Most Cost-Effective Safe

## **Up To 50% Savings Over Traditional Systems!**

Mobility is a major advantage with wireless communications. Cleco LiveWire™ marries the freedom and flexibility of cordless tools with real-time wireless error proofing. Utilizing an industry standard 2.4/5GHz WLAN (Wireless Local Area Network) interface in conjunction with the highest security encryption and authentication levels, plus a 512-cycle tool memory buffer, LiveWire™ ensures you will never compromise safety critical data transmissions.

**Up To 16  
LiveWire  
Tools.\*  
1 Line  
Controller.**

\*Contact Regional Application Center for requirements greater than 10.

**2.4 or  
5GHz  
WLAN**

# Security Critical Solution Available

## Up To 83% More Productivity!

Cleco LiveWire™ tools are now available with Vmax™, a solution that drives tool power and speed increases up to 83% without losing accuracy or durability. This leading innovation utilizes the same 10 tools to one line controller hardware solution with up to 50% cost savings over traditional systems. New Vmax™ technology auto-senses the applied power source and adjusts the maximum tool speed capability on the fly. LiveWire™ with Vmax™ combines the power you need with the most versatile wireless system available today.

### Wireless Security

- WEP (Wired Equivalent Privacy)
  - 64/128 Bit Encryption
- WPA (Wireless Protected Access)/WPA2/802.1x
  - 128 Bit TKIP/CCMP Encryption
  - 802.1x Authentication pre-shared keymode (PSK) - LEAP, PEAP

# Durability. Speed.

Cleco 18-48 series tools are driven by a maintenance-free brushless motor with up to 50% more speed and productivity. This motor technology coupled with our high-resolution resolver offers full range control for safety critical joints. The 18-48 series tools with industry proven gear trains create outstanding durable production performance.

The Cleco 18-48 series electric tools provide a unique modular assembly design for ease of repair. The on-board intelligent memory chip records tool set-up values and counts cycles for maintenance scheduling to prevent costly production downtime.

**Intelligent memory chip**

**Highly visible operator feedback LEDs**

**Error free connector**

(in tool handle)

**Air-LB**

(Tools with Matrix connector available upon request.)

**Low compression switch**

**Ergonomic handle for operator comfort**

**Resolver technology for full range speed control**

# Ergonomics.

**Optimal tool weight and balance**

**Durable industry proven gear train**

**Reaction transducer for consistent torque repeatability**

**Adjustable angle head allows flexible orientation**

**Low inertia brushless motor for superior fastening control**

**Standard tools required for service**

# Durability. Speed

## Cost Effective Solution for Quality Critical Applications.

Cleco **CurrentControl** electric assembly tools provide an up-sell solution to quality critical applications presently specifying a pneumatic clutch tool and verifier combination. Cleco proprietary **CurrentControl** systems up-sell on superior productivity, error proofing and process flexibility.

Our Cleco controller systems are recognized globally for “best in class” software interface. This is accomplished through simple navigation, basic programming screens, visual programming graphics and real-time process feedback. Our latest innovation “Auto Program” takes the guesswork out of programming. Simply enter the application torque target and the software automatically compiles the program for production use.

**Unrestricted Speed Control**

**Adjustable angle head allows flexible orientation**

**Cleco®**

# ed. Ergonomics.

## Why CurrentControl vs. Pneumatic Clutch?

### Superior Productivity

- Up to 2–3X faster
- Unrestricted speed control
- Up to 25% less noise
- Cleaner operating environment
- Auto torque sequencing
- Proven production durability

### Superior Error Proofing

- 96 position fastener count
- 9 tool LED operator feedback
- 8 configurable I/O
- Fieldbus ready
- 5,000 tightening cycle storage
- Advanced system diagnostics
- Barcode application select

### Superior Process Flexibility

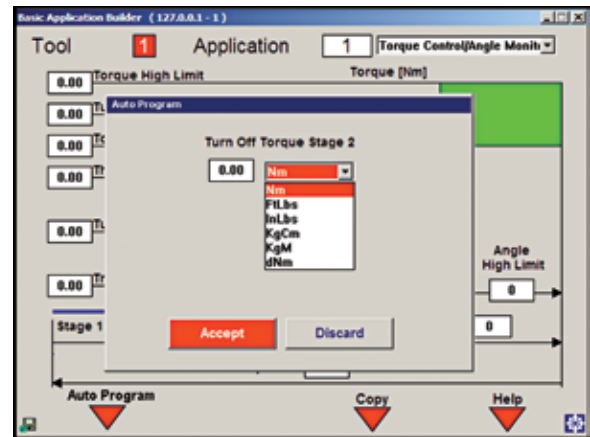

- 255 programmable tightening strategies
- 6 configurable stages per strategy
- Angle process control/monitoring
- Counter-clockwise process control/monitoring
- Less parts to maintain – no clutch
- 100M field cable lengths

## Easy Setup 1-2-3-Go!

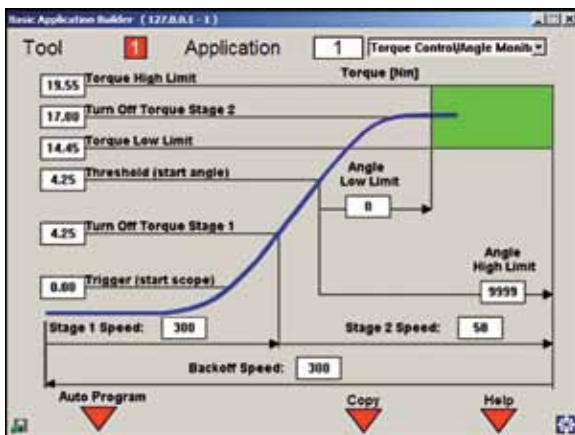

1. Select "Basic" from menu.

2. Enter final torque value.

3. Tool automatically programmed.

Go! Production ready.

# Productivity That D

Introduced in 2005, DGD Intelligent Spindles were the first fixtured nutrunners that offered onboard servo and modular construction. Today, these third generation nutrunners are based on over 50 years of proven success of our conventional spindles.

DGD Intelligent Spindles combine high speed, exceptional up time availability, and unprecedented accuracy and durability in a compact design that requires substantially less cabling than traditional nutrunners. The result is productivity gains at a lower cost,

with up to 30% savings on initial purchase price. DGD Intelligent Spindles also offer easy integration with Cleco electric tool products, including the new Cleco Global Controller.

## Durability & Accuracy

The BTSE nutrunners are certified to the highest standard of accuracy and durability.

- ISO certified to  $\pm 2\%$  accuracy
- 1 million duty cycles maintenance free
- 3 million cycle guarantee @ 80% of capability

## Compact On-Board Intelligence

The on-board servo module is proven technology that has been tested to:

- Shock & Vibration: 3 dimension at 13G
- Temperature : 45° C
- MTBF of 7 million cycles

## Up To 170% Faster

With sealed, long-life, maintenance-free 380 VDC motors, DGD Intelligent Spindles are faster than a conventional spindle at most every torque level.

### DGD Speed Comparison

Torque (Nm)	DGD Conventional Spindle	DGD Intelligent Spindle	DGD RPM Advantage
10	1222	1921	<b>57%</b>
50	329	890	<b>170%</b>
100	329	890	<b>170%</b>
150	219	502	<b>137%</b>
200	220	502	<b>48%</b>

## Reduced Field Cables

DGD Intelligent Spindles provide a solution for the number-one cause of shut-down ... cable failure ... by substantially reducing the number of cables needed. Where DGD conventional spindles each need a separate cable, up to 16 Intelligent Spindles can be run from a single field cable by cascading cables between spindles.

# Drives Cost Savings

**Acquisition & Installation Costs Plus Floor Space Are All Reduced**

DGD Conventional Spindle System Solution	DGD 10 Spindle Requirements		DGD Intelligent Spindle System Solution
	Conventional	Intelligent	
	10	Controllers	<b>1</b>
	10	Field Cables	<b>1</b>
	10	Power Interface Points	<b>1</b>
	5 hrs.	Cable Festooning Time	<b>1 hr.</b>

Cost effective DGD Intelligent System

## Your Single Source For Custom Automated Systems

Automated Systems provides custom solutions for the automated fastening of threaded joints.

Our global customers span the entire vehicle assembly market, including passenger cars and trucks, power train assembly, off-road vehicles, and agricultural machines. We support machine tool builders in the vehicle and industrial markets with custom fastening system designs based on proven fastening product building modules.

Over many decades, Automated Systems has been providing custom solutions for training, service, and support. From single handheld nutrunners to multiple spindle machines, our custom designed systems are used around the world in an interesting variety of applications.

We have a full support staff of Sales Engineers, Mechanical Engineers, Controls Engineers, Project Managers, Field Service Engineers and In house Service Engineers waiting to serve you.

## Custom Automated Solutions

The custom designed equipment Automated Systems creates can be configured in either vertical or horizontal orientations depending on the application and customer requirements

*Shown are two semi-automatic DC electric systems to secure camshaft cover fasteners and water pump assembly mounting fasteners.*

*An automatic station on an engine assembly line uses two opposing electric power heads, each having 8 spindles, and a center power head of 6 spindles.*

utilizing standard components. Designs may incorporate operator input or be fully automated dependent on the needs of the customer.

Automated Systems' products use high-efficiency electric motors manufactured specifically for this application. Available motor torques range from 2 Nm to 4,000 Nm. Motor spindles can be mounted and arranged to match any pattern using standard in-line, special offset, and 90° angle electric motors.

In order to apply our powerhead designs, we also design custom suspension systems along with cable management systems to provide support and movement. In addition to custom built stations fitted with fixtured nutrunner powerheads, Automated System designs, builds, installs and provides service and support from the complete fastening lines.

*The left cylinder head of a V12 engine is being fastened using a 26 spindle fixtured electric multiple. The suspension system has been designed to not only support the weight of the tool, but to rotate into fastening alignment with the cylinder head on the right side of the engine.*

**The above manually operated railroad wheel bearing multiple has the capability to tighten three (3) fasteners equally spaced on various centers between 3.50" to 5.85" diameters up to 600 NM torque.**

### Wheelnut Fastening

Automated Systems is the recognized leader in the design and manufacture of multiple spindle wheelnut assembly systems. We are known across the globe for excellence of innovative engineering design, support, and quality award winning service.

Decades of expertise in the design and manufacturing of multiple spindle fixtured and portable assembly systems have identified Automated Systems as an experienced, innovative supplier capable of creating custom solutions matched to unique customer assembly requirements.

### Medium Duty Wheelnut Tool For Passenger Vehicles requiring Medium Torque, High Volume

- 100 Nm to 500 Nm

Automated Systems supplies custom Wheelnut multiple designs using standard major components with proven track records for reliability, lifetime performance, millions of cycles capability and ergonomic solutions which support operator safety, comfort and efficiency.

Automated Systems makes use of standard system building block components which are used to blend a custom system from a complete line of DC electric spindles, fastening controllers and an extensive listing of twenty-four different fastening strategies which not only include the usual Torque Control, Angle Control and Yield, but also includes the unusual Pulse Torque Recovery makeup torque fastening strategy awarded US Patent number 5,094,301.

### Heavy Duty Wheelnut Tool For Trucks requiring High Torque, Low Volume

- 700 Nm to 1200 Nm

Automated Systems Wheelnut multiples use high-efficiency electric motors manufactured specifically for this application. Available motor torques range from 700 Nm to 1200 Nm. Motor spindles can be mounted and arranged to match any bolt circle pattern, using standard in-line motors with or without offset gearing.

## Adjustable Wheel Stud Centers

When several similar wheels need to be assembled and the economics of separate powerheads dictates a single powerhead, Automated Systems has the answer! Adjustable stud centers. The position of the studs can be controlled by an operator manual switch, or auto detection.

## Budd Double Wheels

When it comes to fastening inner and outer wheel lug nuts including Budd style stud/nut adapters, a wheelnut powerhead requires long retractable spindles which are designed to prevent side loading. Automated Systems has the know-how, and the products to supply wheelnut multiples for double wheel truck applications. Our wheel equipment is more rugged than the trucks it assembles.

## Suspension System

A properly designed suspension system can not only support the tool and return it to a home position, it can also provide a zero gravity lift and hold. The total weight of the tool is controlled by the operator with very little pressure required to move the tool up or down.

## Local Operator Display (Operator Interface)

Each powerhead displays a red, green, and yellow LED on a per spindle basis. The LED display indicates the status of the last tightening as NOK, OK and Low Torque or Angle. An optional local operator interface display can be used to display output, and accept touch screen switch inputs.

Some of the uses of a local operator display include:

- Application selection
- Tool home position jog
- Overall fastening status in green or red
- Part graphics
- Fastening values for torque and angle
- Functional push-button inputs & display outputs

### Push-off and Return

On moving transfer lines, the overhead suspension system can be mounted to an overhead track, supporting the multiple. At the conclusion of the fastening rundown by all spindles, the suspension pushes the tool away from the wheel and returns the tool to the home position ready for the next wheel. The vehicle on the assembly transfer line continues to move while the lug nuts are being tightened.

### Application Detection of Aluminum and Steel Wheels

Wheel lug nut tools are distinguished from standard horizontally aligned systems by their cylindrical shape. Rotation of the tool is required for proper alignment with the wheel lugs, and the ability to provide a clear line of sight for the operator. In addition, a 6 spindle tool can be rotated 30 degrees, rundown a second time and tighten the alternate 6 lug nuts on a 12 lug nut wheel. This alternative design is tightening dual truck wheels, and can automatically determine if the wheel is aluminum or steel and change the fastening parameters automatically.

*Shown are two manually operated vertical multiples and one semi-automatic DC electric systems.*

*Shown above is a ten Intelligent spindle application with nine jumper cables and a single field cable that terminates at the power distribution box.*

## **Reduced Field Cables**

DGD Intelligent Spindles provide a solution for the number-one cause of shut-down ... cable failure ... by substantially reducing the number of cables needed. Where DGD conventional spindles each need a separate cable, up to 16 Intelligent Spindles can be run from a single field cable by cascading cables between spindles. We offer both HighFlex for fixed or flexible routing for heavy duty requirements and SuperHighFlex for robotic and all high mobility applications. See page 76 for more details.

## **Benefits of Intelligent Spindle Field Cables**

- Lower cost of ownership
- Higher durability
- Lower start-up cost
- Reduced cable management systems

*Shown above is a seven Intelligent spindle application with six jumper cables and a single field cable that terminates at the power distribution box.*

# How To Build A DC Fastening System

mPro400GC-M, mPro400GC-P & mPro400GC-S

## Building a DC System for **Safety Critical** applications is as simple as 1, 2, 3!

1. Choose a common system to the right.
2. Select the correct components below.
3. Order your System!

(Refer to Pages 46-47 to build a mPro400GC-E/GC-I system.)

<b>Controller</b> (Page 114)

# Electric Nutrunners – Corded Transducer Control

Hold & Drive Tools

## Cleco®

### Hold & Drive Series

**Torque Range**  
 11 - 227 Nm  
 8.1 - 167.4 Ft. Lbs.

- Brushless precision
- Resolver control
- Transducer control
- Memory intelligence

48EAE115H

“Hold & Drive” bolts are used with these tools in automotive and truck frame applications. They reduce assembly handling to one person working from one side of the workpiece. The bolt is held stationary by the tool while the nut is tightened from the same side.

\*Weights are without tool cable or reaction bar if so equipped.

**General:** All tools must be used with an approved ATG cable and controller.

**Standard Equipment:** Air-LB Connector.

Tools with Matrix connector available upon request.

**Extra Equipment:** Std. tool cable 301866-XX, RA swivel cable 301903-XX, Inline swivel cable 301904-XX, Extension cable 301877-XX.

**Additional Accessories:** See pages 121-129 for additional accessories.

# Electric Nutrunners – Corded Transducer Control

Tube Nut Tools

## Tube Nut Series

**Torque Range**  
10 - 40 Nm  
7.4 - 29.5 Ft. Lbs.

**Bolt Size**  
M6 - M10  
1/4" - 3/8"

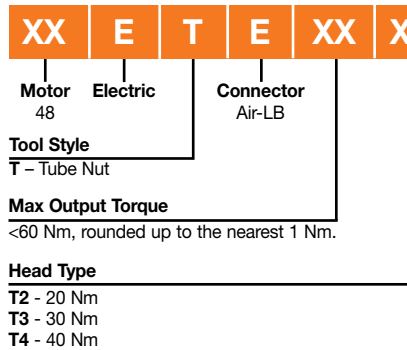

- Brushless precision
- Resolver control
- Transducer control
- Memory intelligence

The 48ET tube nut wrench alternates the direction of rotation each time the lever is actuated. When rotating in reverse, the socket will stop at the open position.

### Tube Nut Tool Nomenclature

### Socket Nomenclature

### Socket Sizes

EA - 1/4"	M5 - 5mm	MH - 14mm	MP - 22mm

## 18EA, 48EA & 67EA Floating Spindle Angle Heads

# How To Build A DC Fastening System

mPro400GC-E & mPro400GC-I

## Building a DC System for **Quality Critical** applications is as simple as 1, 2, 3!

1. Choose a common system to the right.
2. Select the correct components below.
3. Order your System!

(Refer to Pages 26-27 to build a mPro400GC-M/GC-P/GC-S system.)

<b>Controller</b> (Page 114)	
<b>Corded Tool, Transducer Control</b> (Pages 32-44)	
<b>Corded Tool, Current Control</b> (Pages 48-58)	
<b>Cable</b> (Page 122)	
<b>Input Accessories</b> (Page 124)	
<b>Output Accessories</b> (Page 124)	
<b>Input Accessory Cables</b> (Page 124)	
<b>Output Accessory Cables</b> (Page 124)	
<b>Input to Input Accessory Cables</b> (Page 124)	
<b>Isolation Transformer</b> (Page 121)	

→  
Add or delete components as required.

# Cleco®

## Hold & Drive Series

**Torque Range**  
 11 - 227 Nm  
 8.1 - 167.4 Ft. Lbs.

- Brushless precision
- Resolver control
- Memory intelligence

“Hold & Drive” bolts are used with these tools in automotive and truck frame applications. They reduce assembly handling to one person working from one side of the workpiece. The bolt is held stationary by the tool while the nut is tightened from the same side.

### Hold & Drive Tool Nomenclature

**General:** All tools must be used with an approved ATG cable and controller.

**Standard Equipment:** Air-LB Connector. Retraction 1" standard for hold bit.

**Extra Equipment:** Std. tool cable 301866-XX, RA swivel cable 301903-XX, Inline swivel cable 301904-XX, Extension cable 301877-XX.

**Additional Accessories:** See pages 121-129 for additional accessories.

# Electric Nutrunners – Corded Current Control

Flush Socket Tools

## Flush Socket Series

**Torque Range**  
4.9 - 234 Nm  
3.6 - 172.6 Ft. Lbs.

**Bolt Size**  
M8 - M21  
1/2" - 1 3/16"

- Brushless precision
- Resolver control
- Memory intelligence

Flush socket tools have plenty of clearance to fit low clearance applications. Electric flush socket tools tighten with much higher accuracy than tools with crowfoot attachment.

**Standard Equipment:** Air-LB Connector.

**Extra Equipment:** Std. tool cable 301866-XX, RA swivel cable 301903-XX, Inline swivel cable 301904-XX, Extension cable 301877-XX.  
**Additional Accessories:** See pages 121-129 for additional accessories.

# Electric Nutrunners – Corded Current Control

Right Angle Floating Spindle Tools

# Cleco®

## Right Angle Floating Spindle Series

**Torque Range**  
5.1 - 230 Nm  
3.7 - 169.6 Ft. Lbs.

**Bolt Size**  
M7 - M18  
1/4" - 3/4"

- Brushless precision
- Resolver control
- Memory intelligence

48CAE135S461

**Extra Equipment:** Std. tool cable 301866-XX, RA swivel cable 301903-XX, Inline swivel cable 301904-XX, Extension cable 301877-XX.

**Additional Accessories:** See pages 121-129 for additional accessories.

To order individual sockets, use a "CS" prefix before the required socket. (i.e. CSEA01 for a, 1/4", flush, thru hex socket.)

**C1 – 15° Head (Part No. 301959)**

Maximum Recommended Torque: 22 ft.lbs. (30 Nm)

**C3 – 30° Head (Part No. 301960)**

Maximum Recommended Torque: 22 ft.lbs. (30 Nm)

# How To Build A Fixtured DC Tool System

## Building a Fixtured DC Tool System is as simple as 1, 2, 3!

1. Choose a common system to the right.
2. Select the correct components below.
3. Order your System!

### System Control Package - Intelligent Spindle (Page 89)

Controller, Power Transformer, Power Distribution Box, Arcnet Cable, and Stand

### Intelligent Fixtured Spindle (Page 64-87)

### Floating Spindle Adapters (Page 122)

### Field Cables - Intelligent Spindle (Page 88)

### Jumper/Extension Cables - Intelligent Spindle (Page 88)

### System Bus Terminator at spindle - Intelligent Spindle (Page 88)

### Controller - Conventional Spindle (Page 114-118)

### Conventional Fixtured Spindle (Pages 90-111)

### Floating Spindle Adapters (Page 113)

### Field Cables - Conventional Spindle (Page 122)

### Extension Cables - Conventional Spindle (Page 122)

### System Bus Cable - (Page 124)

Add or delete components as required.

# There's A DGD Intelligent S

With straight drive, offset drive, and angle drive configurations, each available with reversible gears, and four different motor sizes to suit different torque requirements, there's a DGD Intelligent Spindle to fit most any situation. Your Apex Tool Group Technical

Sales Representative will work with you to determine the best solution for you. We can also provide you with application assistance in automation integration, joint analysis testing, complex data connection, and more.

**Example**    **1**    **BTSE**    **1B035A**    **2/**    **1M1B**    **1ZB**

<sup>†</sup> Special version - technical drawings on request

The transducer can be rotated for crowded multiple spindle arrangements (DGD 15° radial toothing).

= maximum accessibility. Floating adapter not included with spindle.

2D and 3D are available to download at [www.apexpowertools.com](http://www.apexpowertools.com) in the Customer Support section or on [www.apexpowertools.eu](http://www.apexpowertools.eu) in the download area.

# Intelligent Spindles

Accessories

## Versatility To Work With Many Tool Configurations

DGD Intelligent Spindles can be used in conjunction with any Cleco DC electric tool combination – cordless LiveWire or corded handheld – and with the mPro400GC Global Controller for even greater efficiencies.

### Cleco Global Controllers for Intelligent Spindles

Description	Tool Compatibility	Model
Primary Master	Cleco 18-48 Series, LiveWire, Intelligent Spindle*	MPRO400GC-P
Master	LiveWire, Intelligent Spindle*	MPRO400GC-M
Panel Mount	LiveWire, Intelligent Spindle	MPRO400GC-SG

\* Requires quote to accommodate hardware configurations.

## Connection & Extension Cables For Intelligent Spindles

### HighFlex Quality

- For fixed or flexible routing with heavy-duty requirements in applications with cable drag chain or standard robot applications

### SuperHighFlex Quality

- For robot and all high mobility applications (high durability) with complex motion-sequences
- Available on request

### System Cables for Intelligent Spindle

#### System Bus Cables

Description	Length* (m)	Order No.
System Bus Cable	0.5	544196-005
System Bus Cable	2.0	544196-020
System Bus Cable	5.0	544196-050
System Bus Cable	20.0	544196-200
System Bus Cable	50.0	544196-500

\*The cable lengths are specified in decimeters at the end of the order number

#### Jumper Cables

Description	Length* (m)	Order No.
-------------	-------------	-----------

#### Highflex Type D (Jumper) straight connector on both sides moulded connector housing

	0.5	961104-005
	1.0	961104-010
	2.0	961104-020

#### Highflex Type E (Jumper) 90° connector on both sides rotatable cable glands

	0.5	961299-005
	1.0	961299-010
	2.0	961299-020

\*The cable lengths are specified in decimeters at the end of the order number. Other cable length on request.

#### Primary Field Cables

Description	Length* (m)	Order No.
Highflex Type A Straight connector on both sides	0,5	961104-005
	1	961104-010
	2	961104-020
	3	961104-030
	4	961104-040
	5	961104-050
	6	961104-060
	7	961104-070
	8	961104-080
	9	961104-090
	10	961104-100
	15	961104-150
	20	961104-200
	30	961104-300
	40	961104-400
50	961104-500	

\*The cable lengths are specified in decimeters at the end of the order number

## Power Table

### Overview of possible numbers of channels

The maximum number of DGD Intelligent Spindles per mPro400GC Controller depends on load. When calculating the maximum number of spindles, please consider the following conditions:

- Maximum speed at 20% of maximum torque (at 1BTSE, 2BTSE, 3BTSE and 4BTSE)
- Final tightening stage up to 500 Nm Maximal Speed 50 rpm at maximum torque (at 1BTSE, 2BTSE, 3BTSE and 4BTSE-4B500A..)

- Final tightening stage over 500 Nm Maximal Speed 20 rpm at maximum torque (at 4BTSE-4B660A..., 4BTSE-4B660A-4VK4MS, 4BTSE-4B360A-4Z1250A and 4BTSE-4B460A-4Z1600A)

*If higher settings are chosen, number of channels should be reduced.*

*If different spindle types are used at the controller, the number of channels will be individually defined.*

*Please contact Apex Tool Group.*

Control Type	Maximum number of DGD Intelligent Spindles				Number of cables to fastening control	Comments
	1BTSE...	2BTSE...	3BTSE...	4BTSE...		
CPM3	16	6	6	6	1	OC=Outside Controller
CPM3	16	6	6	6	1	H=With Archnet
CPM6	32	12	12	12	2	Archnet Hub Included
CPM9	...	18	18	18	3	Archnet Hub Included
Control Panel	...	32	32	32	...	Archnet Hub Included

## Power Distribution System

The Power Distribution System is used in conjunction with the Intelligent Spindles. This system is used for power distribution. Includes standard hardware such as E stop circuitry, 24VDC power supply, line filter, CPM, necessary relays, disconnect and viewing window. External power transformer is required.

Power Distribution System	Part No.
CPM3	PDB-CPS3
CPM6	PDB-CPS6
CPM9	PDB-CPS9

### CPM3 With Internal Power Transformer and Without Viewing Window

Contact your local Application Center for more information.

### CPS6 / CPS9 With mPro400-SG and Internal Power Transformer

Contact your local Application Center for more information.

## Power Control Package

Each Power Control Package consists of the following:

- mPro400 GC-M Global Controller
- PDB-CPS X power distribution box with viewing window
- Power transformer
- Stand

### Part Number

- MPRO400GCMPCPS3A
- MPRO400GCMPCPS3T
- MPRO400GCMPCPS6A
- MPRO400GCMPCPS6T
- MPRO400GCMPCPS9A
- MPRO400GCMPCPS9T

*T=PLC Siemens S7 for additional I/O*

## Torque Transducer Verification Fixture (TTVF)

Fast, accurate, cost effective way to verify your torque transducer on the assembly line measure. Included is a joint simulator, slip ring torque transducer and spindle adapter. The joint simulator can be mounted to a tooling plate or mounted to the spindle directly. Any data recorder with the proper interface can be used.

Torque Range (Nm)	Part No.

\*Weights are without tool cable and mounting plate.

**Note:** All 67 series tools require an isolation transformer (544185PT) for use with Cleco Global Controller.

**General:** All tools must be used with an approved ATG cable and controller.

**Standard Equipment:** 18/48 series tools; Air-LB Connector; Mounting plate.

Tools with Matrix connector available upon request.  
67 series tools; Matrix Connector; Mounting plate

**Extra Equipment:** 18/48 tools; Std. tool cable 301866-XX, RA swivel cable 301903-XX, Inline swivel cable 301904-XX, Extension cable 301877-XX.

67 tools; Std. tool cable 542778-XX, RA swivel cable 544055-XX,

Inline swivel cable 544056-XX, Extension cable 542779-XX.

**Additional Accessories:** See pages 121-129 for additional accessories.

Accessories

## Connection & Extension Cables For Conventional Spindles

### Field Quality

For fixed cables, e.g. in stationary machine components

### HighFlex Quality

For movable cables with demanding requirements

### SuperHighFlex Quality

For movable cables and extreme requirements, e.g. robot applications

### Type C

Extremely flexible, direct connection between the nutsetter and nutsetter control unit in HighFlex quality

### Type B

Fixed cable in field quality from intermediate connection point to the nutsetter control unit

### Type A1

Extremely flexible connection in HighFlex quality between nutsetter and intermediate connection point

### Type A2

Alternative to 960430-xxx for robot applications; extra-flexible connection between nutsetter and intermediate connection point in SuperHighFlex quality

① Push-Pull connector

② Connectors

③ S961062 shield terminals are required for each TMx channel

Ⓒ Field Cable Highflex quality

# Cleco mPro400GC Global Controller

Master, Primary & Secondary

## mPro400GC Global Controller

- Graphics interface
- Fully programmable
- Local storage of 10,000 cycles
- LAN capable
- Fieldbus options available

Master/Primary Unit

Secondary Unit

MPRO400GC-M

MPRO400GC-P

MPRO400GC-S

## mPro400GC-SG Global Controller

The mPro400GC-SG controller provides the same capabilities and functions as the mPro400GC-M controller with the added convenience of panel mount installation.

Model	Description	Tool Compatibility	Weight		Width		Height		Depth	
			lbs.	kg	in.	mm	in.	mm	in.	mm
MPRO400GC-P	Primary	Cleco 18-48 Series, LiveWire, Intelligent Spindle*	30.7	13.9	10.3	261.62	14.9	378.46	12.9	327.66
MPRO400GC-S	Secondary	Cleco 18-48 Series	28.1	12.7	10.3	261.62	14.9	378.46	12.9	327.66
MPRO400GC-M	Master	LiveWire, Intelligent Spindle*	23.3	10.6	10.3	261.62	14.9	378.46	12.9	327.66
MPRO400GC-SG	Panel Mount	LiveWire, Intelligent Spindle, 1,2,3,4								

\*Requires quote to accommodate hardware configurations.

Note: 17/47/67 and Matrix versions of the 18/48 series tools require Isolation Transformer 544185PT for use with Primary/Secondary controllers.

Panel Mount can be used in different cabinet solutions.

## Cleco®

### Torque Control mPro400GC-E & mPro400GC-I Global Controllers

- Single channel
- Economical
- Remote programming
- Local storage of 5,000 cycles
- LAN capable
- Input Voltage: 115/230VAC
- Connections:
  - 1x Serial
  - 1x TM-COM
  - 1x Ethernet
- Inputs/Outputs:
  - 8x 24V Inputs,
  - 8x 24V Outputs

MPro400GC-E & MPro400GC-I

All 67 Series Tools require an isolation transformer (544185PT) for use with Cleco Global Controller.

Model	Description	Tool Compatibility	Weight		Width		Height		Depth	
			lbs.	kg	in.	mm	in.	mm	in.	mm
MPro400GC-E	Torque Control	Cleco 18-48 E_E Series*	32.8	14.8	10.3	261.62	14.9	378.46	12.9	327.66
MPro400GC-I	Current Control	Cleco 18-48 C_E Series**	32.8	14.8	10.3	261.62	14.9	378.46	12.9	327.66

\*Note: 17/47/67 and Matrix versions of the 18/48 series tools require Isolation Transformer 544185PT for use with GC-E model.

\*\*Note: 48 series tools require 230 VAC.

**Standard Equipment:** TM-COM Remote Programming Software, Null Modem Serial Cable, and crossover Ethernet cable.

# DGD mPro400SG Global Controllers

DGD Spindle Controllers

## mPro400SG Global Controllers

- Graphics interface
- Fully programmable
- Local storage of 10,000 cycles
- LAN capable
- Fieldbus options available

The mPro400SG can be substituted for a remotely mounted mPro400GC-M.

S112849-SG – DGD size 1 & 2 spindles

S112850-SG – DGD size 1 & 2 spindles

S112870-SG – DGD size 3 & 4 spindles

The Mid-Six controller is a wall mounted design capable of handling up to six conventional spindles. It is shown with the optional surface mount mPRO400 controller. Contact the factory for a quotation.

Model	Order No.	Tool Compatibility	Width		Height		Depth	
			in.	mm	in.	mm	in.	mm
MPRO400SG	S112849-SG	DGD Spindles, size 1 & 2, 1.2/01-channel	18.9	480.0	14.2	360.0	11.0	280.0

## Remote Programming Software

Cleco's remote programming software delivers ultimate control to the user, empowering them to control the production process remotely through programming that is easy to use and intuitive. Anything that can be programmed locally on the controller can also be performed from a remote location using the exact same screens.

Using this software to monitor, modify, and/or manage the production line will increase your efficiency and productivity. Centralized management of the tightening process assures quality products.

TM-COM (for GC-E/GC-I controllers) can communicate using either a RS232 or TCP/IP connection. mProRemote (for GC-M/GC-P controllers) utilizes a TCP/IP connection only.

### Software

Part Number	Description
mProRemote	Provided with each mPro400GC-M & mPro400GC-P
TM-COM	Provided with each mPro400GC-E & mPro400GC-I

### mProRemote & TM-COM Minimum System Requirements

- Operating System:** Windows 2000, NT or XP
- Processor:** Pentium
- Memory:** 256MB
- Free Disk Space:** 10MB per controller

### System Component Connectivity

This diagram is intended to show how various components connect in a system, not necessarily the exact components required to create a particular system.

\*These items do not apply to mPro400GC-E and mPro400GC-I

## mPro400GC-IT Isolation Transformer

The purpose of the Isolation Transformer is to allow use of legacy Matrix connector tools (17/47, 18/48, and 67 Series) with the Global Controller and maintain safety and CE standards.

Air-Lb Connector

Matrix Connector

- 115/230 VAC Operation Selectable (Not auto sensing, switch selectable). Factory default setting is 230 VAC.
- All connection cables included except Tool Cables. See below.

## 544185PT Isolation Transformer Applications

Controller	Tool Used					
	17/47E_XX (Matrix)	18/48E_XX (Matrix)	18/48E_EXX (Air-Lb)	67E_XX (Matrix)	17/18C_EXX (Air-Lb)	Fixtured Spindles (DGD/EMT)
TME/TMEM	No	No	Adapter Cable Required	No	NA	NA
mPro400GC-P	Yes	Yes	No	Yes	NA	NA
mPro400GC-S	Yes	Yes	No	Yes	NA	NA
mPro400GC-M	NA	NA	NA	NA	NA	NA
mPro400GC-E	Yes	Yes	No	Yes	NA	NA
mPro400GC-I	NA	NA	NA	NA	No	NA

## Matrix Tool Cables

For use with Matrix connector style tools used with isolation transformer above.

Model Number		Swivel		Length

## 2.4GHz to 5.0GHz Upgrade Kit

Upgrades are available at your local ATG Application Center to upgrade the W and X series 2.4GHz tools to a 5.0GHz Y series tool.

## LiveWire Communication Access Points

Part No.	Description
961390	XBEE 802.15.4 Base Station
544249PT	WLAN Dual Band 2.4/5GHz (US)
961453PT	WLAN Dual Band 2.4/5GHz (EU)

Radio Range: 30-50 meters (XBEE 30 meters max.)  
IEEE 802.11a/b/g (depending on tool)  
Max. Tools: 16 (Contact Regional Support Center for requirements greater than 10)

## Preventative Maintenance Diagnostics

- USB to PC interface
- Displays discharge cycles, total and per cell voltage
- Better diagnostics
- Easy to troubleshoot

Battery service interface allows cycles and cell voltages to be read via serial interface cable.

## mPro400GC Program & OS Software

542972	Start Box
542973	Stop Box
542974	Start/Stop Box
542975	Start/Stop/Reverse

542975

### Bits & Socket Trays (Global Controller Only)

Part No.	Description
544241PT	Tray - 4 Position with 10m cable
544242PT	Tray - 8 Position with 10m cable
S970716	Replacement Inserts

Maximum socket diameter 1.125".

544241PT

S970716

### Socket Only Trays

Part No.	Description
542978-4	Socket Tray - 4 Position
542978-8	Socket Tray - 8 Position

Notes: Up to 16 linked 4 position trays maximum.  
Minimum socket O.D. 1". Maximum O.D. 2.25".  
See below for Socket Posts and Lockout Washers

542978-4

### Socket Posts

For use with 542978-4 & 542978-8 socket trays.

Part No.	Socket Post Size	Part No.	Socket Post Size
99249181	.550/.540	99249158	.687/.677
99249169	1.062/1.052	99249157	.875/.865
99249165	.590/.580	99249156	1.000/.990
99249164	.945/.935	99249148	1.125/1.115
99249163	.827/.817	99249147	.938/.928
99249162	.709/.699	99249104	.750/.740
99249161	.625/.615	99249103	.669/.659
99249160	.437/.432	99249102	.562/.552
99249159	.812/.802	99249101	.500/.490

Note: Select socket post size within tolerance of socket used.

Choose largest socket post size (diameter) that will accept the hex size of the intended socket.

### Lockout Washer

For use with 542978-4 & 542978-8 socket trays.

Part Number	Note
99248150	Vacant position lockout washer

Required for unused positions on the 542978-4 & 542978-8 socket tray.

### Accessory Cables

Part No.	Description
544237-1M	Accessory Input Cable - 1M
544237-5M	Accessory Input Cable - 5M
544237-10M	Accessory Input Cable - 10M
544237-15M	Accessory Input Cable - 15M
542986-1M	Accessory to Accessory Cable - 1M
542986-5M	Accessory to Accessory Cable - 5M

544238-1M	Accessory Output Cable - 1M
544238-5M	Accessory Output Cable - 5M
544238-10M	Accessory Output Cable - 10M
544238-15M	Accessory Output Cable - 15M

## Tool & Cable Tester

Part No.	Description
961024	Tool & cable tester tool memory programming
542991	Tool & cable tester

Note: Adapter cable required for Air-Lb tools. Contact Tech Service.

## Lever Extension Kits

Description	Part No.
Lever Extension Kit (non-swivel)	541757
Lever Extension Kit (swivel)	543414

Note: Models for standard tool cable (non-swivel) and swivel cable.

## Suspension Bail

Description	Part No.
Tool suspension bail	1110909

## Test Fixture

Part Number
536185

**Medium to Hard Torque**  
 Belleville Washer Test Fixture is clamped in a vise and used to test tools (10 In. Lbs. – 100 Ft. Lbs., 1.13Nm – 135.6Nm). Washers can be rearranged to simulate “hard” or “soft” joints.

3/4" Hex  
 100 Ft.Lbs.  
 Max.  
 1/2" Hex  
 25 Ft.Lbs.  
 Max.

## Double Joint Simulators/Test Fixture

- Separate simulator for soft and hard joint
- Inclusive mounting plate

Part Number	Description
W09164K	5 Nm hard joint/15 Nm soft joint
W08780K	10 Nm hard joint/35 Nm soft joint
W08779K	20 Nm hard joint/55 Nm soft joint

W08779K

## Joint Simulator

Joint simulators are most frequently used to certify the repeatability of nutrunners before being installed on a production line and are also an excellent means of testing nutrunners following repair.

The Joint Simulator can simulate and test the torque output of nutrunners on both hard and soft joints. Each Joint Simulator is supplied with a quantity of spring washers which are used to test tool accuracy. Torque per revolution is varied by stacking the spring washers in different combinations.

Electronic torque testing is accomplished by attaching an external rotary transducer between the tool's square drive and the socket.

- Easy access, load, set-up and maintenance.
- Heavy-duty and economical.
- Adjustable torque reaction bracket can accommodate virtually any tool.
- For use with reversible/ non-reversible tools.

Part No.	Torque Range		Width		Height		Length

### Articulating Support Arms

The basic underlying reason for the use of an articulating arm is to improve productivity through applied ergonomics. A manufacturer cannot ignore the pressure to improve productivity of employees because of the impact productivity has on the bottom line.

Automated Systems offers an articulating arm that can be designed for your suspension application. Articulating arms are also called tool balance arms. Automated Systems' HDA series articulating arms are sized and designed to accommodate different size tools and mounting brackets required for specific applications. The arm can be suspended from an overhead rail,

structural column, ceiling mounted or post. The tool is typically mounted on the end of the arm.

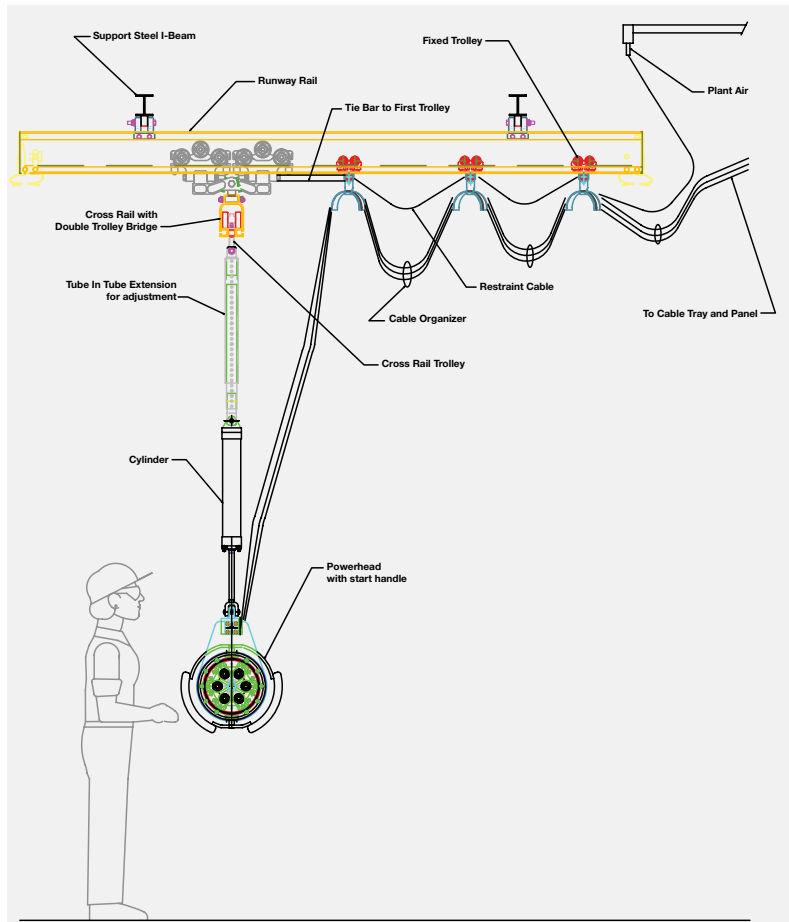

Uses for Articulating Arms	Typical Articulating Arm Features	Optional Features
<ul style="list-style-type: none"> <li>■ Stop or AGV stations</li> <li>■ Slow moving conveyor arms</li> <li>■ Work cells</li> <li>■ Side or overhead tool position work</li> </ul>	<ul style="list-style-type: none"> <li>■ Single or parallel arms</li> <li>■ Arm leveling base</li> <li>■ Boom</li> <li>■ Air balancing cylinder</li> <li>■ Mounting end</li> <li>■ Lift arm</li> </ul>	<ul style="list-style-type: none"> <li>■ Pneumatic or electric disc brake</li> </ul>

### Cable Management

Automated Systems can provide you with assistance ranging from concept to installation of an efficient cable management solution. Automated Systems equipment uses cables in conjunction with hand held tools, fixtured hand tools or when nutrunners are provided for incorporation into automated systems.

Cables need to be protected throughout their routing. We protect the cables from machine movement, equipment, chaffing, sharp objects, vibration, heat and liquid.

We have a full support staff of Sales Engineers, Mechanical Engineers, Controls Engineers, Project Managers, Field Service Engineers and In-house Service Engineers waiting to serve you.

*Typical two spindle multiple with Intelligent spindle open frame, horizontal compliance device and operator interface box.*

**Repair bay operator is using a two spindle fixtured tool to fasten components of a wheel hub assembly.**

## Modular Handling Systems for Handheld Nutrunners & Tightening Spindles

### Advantages

- High flexibility/adaptability to your fastening application
- Compact and coordinated system
- Effortless handling
- Can handle DGD and EMT spindles as well as Cleco DC nutrunners
- Modular components means short delivery times

#### Standard Features

- Dual start/stop handles
- Lightweight aluminum covers & frame
- E-stop
- Ease of service. Easy spindle removal for maintenance or calibration
- Remote spindle indicator lights

- 2 inch retractable spindle travel
- On-powerhead calibration
- Extended support tubes

#### Optional Features

- Powerhead kick-off from wheel
- Remote digital display (MMI)

- Headlights
- Adjustable spindle centers
- Auto spindle retraction for multi-product assembly lines
- Fabricated steel suspension arm
- Part detection

## Typical Torque Handling System Configurations

**Horizontal Rear Trunion Mount (Wheelnut Application)**

**Horizontal Front Trunion Mount (Wheelnut Application)**

**Horizontal Enclosure (Exhaust Manifold Application)**

**Angled Down Swivel Open Frame (Rocker Application)**

**Vertical Down Enclosure (U-bolt Application)**

**Vertical Up Enclosure (U-bolt Application)**

## Quality Fastener Tools

For more than half a century Apex has maintained the position of world leader in industrial fastening tools. Many power and insert bits, socket combinations and other drivers/adapters pioneered by Apex have today become industry standards, while Apex quality, service and selection give you unsurpassed value.

### More Quality For Your Money

Apex quality starts with the selection of raw materials. Only carefully chosen, high grade tool steel is used to make Apex industrial fastener tools. Next, each tool is precision machined from solid bar stock to exacting standards of accuracy. You always get a snug, secure fit – a fit that is not possible from stamped tools.

Finally, each Apex fastener tool is tempered with our exclusive heat treating process. During this step the degree of hardness is determined based upon the application.

### Fast Delivery

All Apex standard catalog items are available off-the-shelf for immediate delivery. If you need special assistance with your order, your Apex manufacturer's representative can handle any questions you may have.

### Special Orders

Apex offers the broadest selection of screw driver and nut runner tools available, from bits, sockets and universal wrenches to extensions, adapters and nut setters. If you have a special application, contact your Apex representative. We may have what you need in stock, or can design and produce special fastener tools for almost any application.

### Ordering Information

Apex products are distributed world-wide. For a catalog of the complete line of Apex quality fastener tools or to locate your nearest Apex distributor, visit our website at [www.apex-tools.com](http://www.apex-tools.com).

# APEX® Guard™

## Quality Anti-Mar Fastener Tools Begin With Quality Fastener Tools.

Apex **μ-Guard™** provides a protective barrier between genuine Apex fastener tools and your finely finished workpiece. The free-spinning patent-pending design provides maximum protection for polished and highly sensitive surfaces.

Apex **μ-Guard™** covering is made of a thermo plastic urethane (TPU elastomer) which cushions against costly incidental side impacts. It offers the lowest coefficient of friction for maximum tool efficiency. It is also non-removable for tamper resistance.

With Apex **μ-Guard™** you get the proven Apex fastener tool fit and performance plus the best protection available against marring and in-system damage.

**μ-Guard™** is your guard against the potential hazards caused by rotational friction.

*If it doesn't say Apex  
on the outside, how can  
you be sure of what's  
on the inside?*

*Prevents Side Impact Damage*

*Free-Spinning Design*

*Virtually Damage Free*

M36 x 4.00	2557	1918	3659	2744	4276	3208

Lubed means cleaned dry bolts lubricated with a standard medium viscosity machine oil. Lubricate all contact areas of the bolts and washers. Lubricating the bolts is the suggested method.

Miscellaneous Conversion Factors			Air Pressure Conversion		
To Convert	Into	Multiply By	PSI	kPa*	Bar**

bar	psi	14.5			

\*Preferred: Approximate to the nearest 5 kPa.  
\*\*Approximate to the nearest 0.5 Bar.

## One Of The Broadest Range Of Tools In The World Is At Your Fingertips!

Apex Tool Group covers a wide range of industrial markets, including aerospace, automotive, foundries, furniture, general industry, metal fabrication, petroleum, power generation, shipbuilding, and transportation. These markets have been served by Apex Tool Group's brands for many decades, by offering our customers solutions and products that meet their demanding productivity requirements.

To receive a product catalog quickly, just go to [www.apexpowertools.com](http://www.apexpowertools.com) or [apexpowertools.eu](http://apexpowertools.eu). Select the literature you want. Then complete the "Contact Information" form, hit "Submit Request" and your order will be processed immediately. Materials normally arrive within 48 hours.

### Below are a few of our more popular power tools catalogs

**Apex Fastener Tools**  
A comprehensive line of industrial quality bits, finders, sockets and extensions.  
(Catalog # TC-100)  
[www.apex-tools.com](http://www.apex-tools.com)

**Dotco/Cleco Material Removal Tools**  
A full line of pneumatic material removal tools including drills, sanders, and grinders.  
(Catalog # SP-102)  
[www.dotco-tools.com](http://www.dotco-tools.com)

**Master Power Industrial Air Tools**  
A complete line of industrial pneumatic tools for assembly and material removal applications.  
(Catalog # SP-904)  
[www.masterpowertools.com](http://www.masterpowertools.com)

**Apex Universal Joints**  
Industrial quality universal joints that can be custom designed for most any application.  
(Catalog # SP-1400)  
[www.apexuniversal.com](http://www.apexuniversal.com)

**DGD Assembly Systems**  
A complete line of spindles, D.C. electric assembly tools and controllers for the MV.  
(Catalog # SP-703DE/EN)  
[www.apexpowertools.eu](http://www.apexpowertools.eu)

**Utica Torque Products**  
A full line of torque measuring products including torque screwdrivers, torque wrenches and analyzers.  
(Catalog # SP-301)  
[www.uticatools.com](http://www.uticatools.com)

**Cleco Pneumatic Assembly Tools**  
A full line of industrial pneumatic assembly tools from screwdrivers to nutrunners to impacts.  
(Catalog # SP-1000)  
[www.clecotools.com](http://www.clecotools.com)

**Cleco Power Motors**  
A comprehensive line of industrial pneumatic motors for a multitude of applications.  
(Catalog # SP-104)  
[www.clecotools.com](http://www.clecotools.com)

**Airetool Tube Cleaners & Expanders**  
A complete line of industrial tube cleaners, expanders and installation tools.  
(Catalog # SP-1100)  
[www.airetools.com](http://www.airetools.com)

**Cleco D.C. Electric Assembly Tools**  
A complete line of industrial D.C. electric assembly tools and controllers.  
(Catalog # SP-1020)  
[www.clecotools.com](http://www.clecotools.com)

## Warranty

Apex Tool Group, LLC warrants products and parts sold by it, insofar as they are of its own manufacture, against defects of material and workmanship, under normal use and service in accordance with its written instructions, recommendations, and ratings for installation, operation, maintenance, and service of products, for a period of **ONE YEAR FROM THE DATE OF INITIAL USE, BUT IN NO EVENT SHALL THE WARRANTY EXCEED 24 MONTHS FROM DATE OF DELIVERY TO DISTRIBUTOR.** Proof of Purchase with shipment date must be furnished by the user to validate the warranty. This warranty applies only to products manufactured by Apex Tool Group and specifically excludes products manufactured by others. Products not manufactured by Apex Tool Group are warranted only to the extent and in the manner warranted to Apex Tool Group by the manufacturer

and then only to the extent Apex Tool Group is able to enforce such warranty. Apex Tool Group's warranty with respect to products manufactured by it is limited to the repair or replacement, as Apex Tool Group may elect, of any defective part regarding which the Distributor has given 5 days written notice from the discovery of such defect. Installation and transportation costs are not included. Apex Tool Group shall have the option of requiring the return to it of the defective material, transportation prepaid, for inspection. No allowance will be made for repairs without Apex Tool Group approval. **APEX TOOL GROUP MAKES NO OTHER WARRANTY OF ANY KIND WHATSOEVER, EXPRESSED OR IMPLIED, AND HEREBY DISCLAIMS ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.**

## Lubrication Products

Apex Tool Group products are classified as non-hazardous manufactured items, defined in the OSHA 1910.1200 Hazard Communication Standard as "Articles". These products, under conditions of normal use, do not release or cause exposure to a hazardous chemical.

Under normal conditions of use, lubrication products sold separately for or used within these tools should not cause an exposure hazard. Refer to the Material Safety Data Sheet (M.S.D.S.) for Safety and Disposal Information. M.S.D.S. sheets are available upon request from Apex Tool Group.

Apex Tool Group is also aware of, and complies with, the provisions of section 611 amendments

to the Clean Air Act of 1990. No ozone depleting chemicals have been used in the manufacture of our products.

If you resell or distribute these products, you have the responsibility for ensuring that the Material Safety Data Sheets are provided to the purchaser.

Proper lubrication is essential to the economical operation of pneumatic and electric tools. Apex Tool Group perform better and their life is extended by using the recommended lubricants. All lubricants that are listed in the accessory section of this catalog have undergone extensive testing and are recommended for use with Apex Tool Group products.

## Fastener Selection

The suggested fasteners listed in this catalog are determined by matching a tool's maximum rated load to Society of Automotive Engineers (SAE) Grade 5 and International Organization of Standardization (ISO) Grade 9.8 fasteners. The torque capabilities for SAE Grade 5 fasteners are from SAE Manual, SAE J429 (Mechanical and Material Requirement for Externally Threaded Fasteners). The torque capabilities for ISO Grade 9.8 fasteners are from ISO 898-1 (Mechanical Properties of Fasteners). All values selected are based on lubricated fasteners.

The suggested fasteners listed in this catalog are advisory only, and Apex Tool Group recommends that you further consult other technical references before final tool selection. Reliance on the accuracy of this catalog data for any purpose by anyone is at the sole risk of that person. Apex Tool Group is not responsible for any loss, claim, or damage arising from improper tool selection.

The torque values listed under the headings "TORQUE" are tested on an ISO 5393 soft joint rate test fixture unless otherwise stated by a special note.

## Power Tools Sales & Service Centers

Please note that all locations may not service all products. Please contact the nearest Apex Tool Group Sales & Service Center for the appropriate facility to handle your service requirements.

### DETROIT, MICHIGAN

**Apex Tool Group  
Sales & Service Center**  
2630 Superior Court  
Auburn Hills, MI 48326
